

Profile

JANE SAMPLE
 REPORTED TYPE: **ENTP**
 APRIL 17, 2008

This Profile gives you information about your personality type based on your answers to the MBTI® Form Q instrument. It first indicates your Step I results—your reported four-letter type. Next it shows your Step II results—your expression of five facets of each of the four type dichotomies.

Your Step I Results

ENTPs tend to be quick, innovative, and interested in many things. Alert and outspoken, they may argue for fun on either side of a question. They are resourceful in solving new and challenging problems, but may neglect routine assignments. ENTPs are skillful at finding logical reasons for what they want.

The length of the bars on the graph above shows how consistently you chose one preference pole over the other. The longer the bar, the more often your answers indicated that pole, and the more likely it is that the instrument has accurately reflected your preference.

Your Step II Results

The graphs show how you express five facets of each MBTI dichotomy. Your results indicate how you may be similar to and different from other people of your personality type. The longer the bar, the clearer your preference is for that pole of the facet. Scores of 2-5 that are on the same side as your overall preference indicate in-preference results. Scores of 2-5 on the opposite side of your preference indicate out-of-preference results. Scores of 0 and 1 are in the midzone and often mean a situational or muted use of either pole.

THINKING (T)

Basing conclusions on logical analysis with a focus on objectivity

(F) FEELING

Basing conclusions on personal or social values and a focus on harmony

JUDGING (J)

Preferring decisiveness and closure

(P) PERCEIVING

Preferring flexibility and spontaneity

Interpreter's Summary

PREFERENCE CLARITY INDEXES FOR REPORTED TYPE: ENTP

Extraversion: Moderate (9)	Intuition: Clear (23)	Thinking: Moderate (8)	Perceiving: Clear (25)
-----------------------------------	------------------------------	-------------------------------	-------------------------------

FACET SCORES AND THE AVERAGE RANGE OF SCORES FOR OTHER ENTPs

The bars on the graphs below show the average range of scores that occurred for the ENTPs in the national sample. The bars show scores that are -1 to +1 standard deviations from the mean. The vertical line in each bar shows ENTPs' mean score. The bold numbers show the respondent's scores.

POLARITY INDEX: 80

The polarity index, which ranges from 0 to 100, shows the consistency of a respondent's facet scores within a profile. Most adults score between 50 and 65, although higher indexes are common. An index that is below 45 means that the respondent has many scores in or near the midzone. This may be due to mature situational use of the facet, answering the questions randomly, lack of self-knowledge, or ambivalence about use of a facet. Some such profiles may be invalid.

Number of Omitted Responses: 0
